

The Open Group® Certification for People: Open FAIR™ Certification Program Summary

The Open Group Certification for People: Open FAIR Certification Program (the Program) makes certification available to people who demonstrate knowledge and understanding of the Body of Knowledge covered by the Program. Open FAIR provides a model for understanding, analyzing, and measuring information risk. The outcomes are more cost-effective information risk management, greater credibility for the information security profession, and a foundation from which to develop a scientific approach to information risk management. This allows organizations to:

- Speak in one language concerning their risk
- Consistently study and apply risk to any object or asset
- View organizational risk in total
- Challenge and defend risk decisions

Open FAIR™ Foundation

The learning objectives for Open FAIR Foundation certification focus on knowledge and comprehension.

Target Audience

- Individuals who require a basic understanding of Open FAIR, the Risk Analysis Standard, and the Risk Taxonomy Standard
- Professionals who are working in roles associated with a risk analysis project, such as those responsible for planning, execution, development, delivery, and operation
- Risk analysts who are looking for a first introduction to Open FAIR, the Risk Analysis Standard, and the Risk Taxonomy Standard
- Risk analysts who want to achieve Open FAIR Certified (Advanced) certification (when offered) in a stepwise approach

The Value of Certification

Individuals certified at this level will have demonstrated their understanding of:

- The basic concepts of risk analysis
- The risk taxonomy and terminology
- How to develop and interpret Open FAIR risk analysis results
- The process of risk analysis
- How risk elements can be measured
- The Open FAIR Certification Program

Examination

Certification is only achieved after passing the examination.
