Introduction

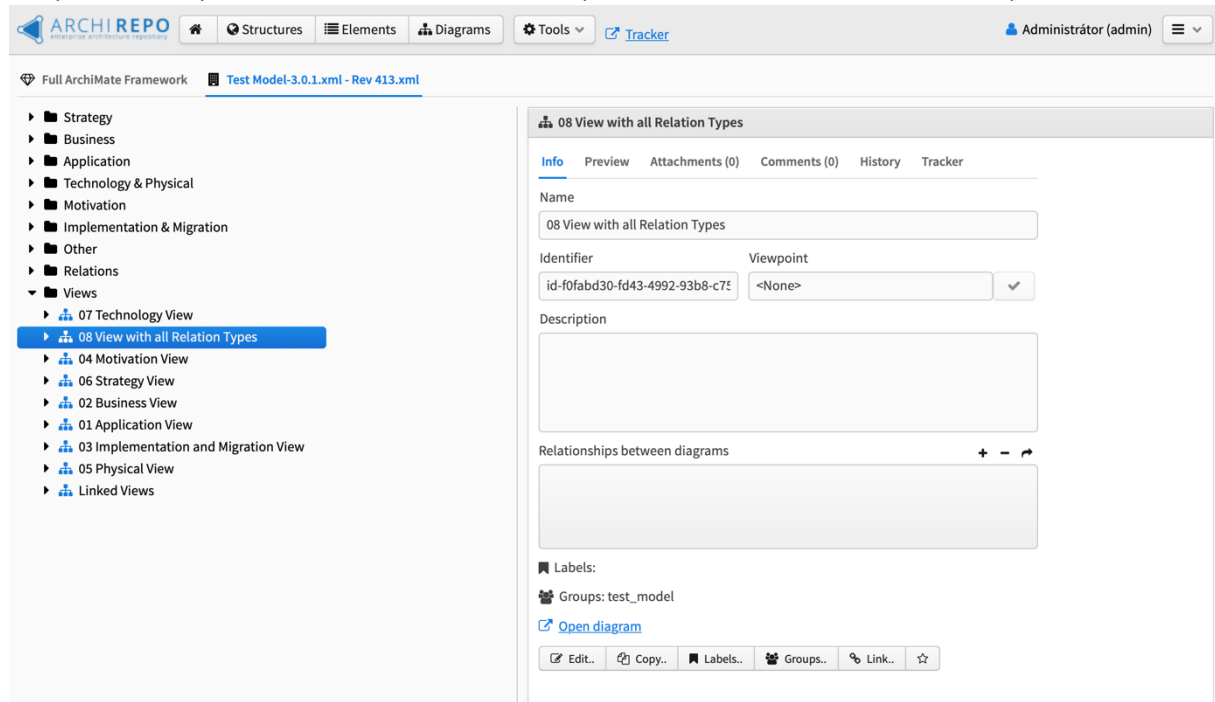

This document describes the process of exporting sample views from ArchiREPO to external tool using OpenGroup ArchiMate Exchange File Format.

All views below were used for certification in ArchiREPO (v 1.0.2) released in September 2018.

Export Process

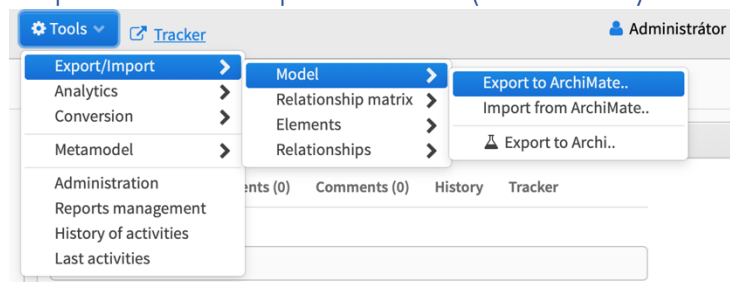

This section describes the process of exporting a model from ArchiRepo to external modelling tool. Although the below showcased example uses Archi as a target modelling tool, functionality of Export / Import functions was also tested and verified for Enterprise Architect (Sparx Systems) and Visual Paradigm (Visual Paradigm). Any modelling tool that adheres to the structure of XML exchange file format defined by Open Group will be able to import data from ArchiRepo as shown below.

Step 1 – Verify that the contents to be exported are available in ArchiRepo

The screenshot shows the ArchiRepo web interface. The top navigation bar includes 'Structures', 'Elements', 'Diagrams', 'Tools', and 'Tracker'. The user is logged in as 'Administrátor (admin)'. The main content area displays a tree view of the model structure on the left, with '08 View with all Relation Types' selected. The right pane shows the details for this view, including its name, identifier, viewpoint, and description. The 'Labels' section shows the group 'test_model'.

Step 2 – Run the export function (make sure you have appropriate user rights)

The screenshot shows the 'Tools' menu open in the ArchiRepo web interface. The 'Export/Import' option is selected, which has opened a sub-menu. In this sub-menu, the 'Model' option is selected, which has opened another sub-menu. In this final sub-menu, the 'Export to ArchiMate..' option is highlighted. The user is logged in as 'Administrátor'.

Step 3 – Select which part of the model to export (views, elements, folders).

Export of diagrams ✕

Diagrams to export

Add diagrams..
Add from favorites..
Remove

Prvky

Export only elements presented on the diagrams

Export elements presented on the diagrams and/or explicitly selected

Export all elements (including those not presented on the diagrams)

Other options

Export folder organization

Output format ArchiMate 3.0 [.xm] ▼

✔ OK
✘ Cancel

Step 4 – Select contents (in this case – views) to include in the export.

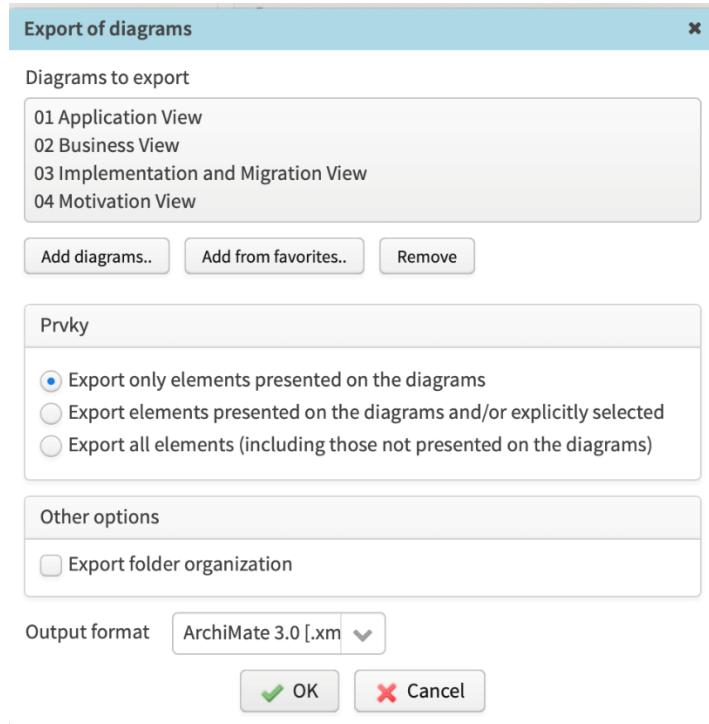

Select diagrams ↗ ✕

Identifier Name Labels Groups Filter Clear filter

Detail + - Multiple selection ✔ Select and close [Open diagram](#) 9/69 records selected/displayed

<input type="checkbox"/>	Name	Labels	Groups	Elem...	Relat...	Attac...	Commented	Created	Updated	Created by	Updated by

<input checked="" type="checkbox"/>	04 Motivation View		test_...	29	28	0		28-11-2018		Vilím Tomáš	
<input checked="" type="checkbox"/>	05 Physical View		test_...	12	15	0		28-11-2018		Vilím Tomáš	
<input checked="" type="checkbox"/>	06 Strategy View		test_...	19	11	0		28-11-2018		Vilím Tomáš	
<input checked="" type="checkbox"/>	07 Technology View		test_...	35	22	0		28-11-2018		Vilím Tomáš	

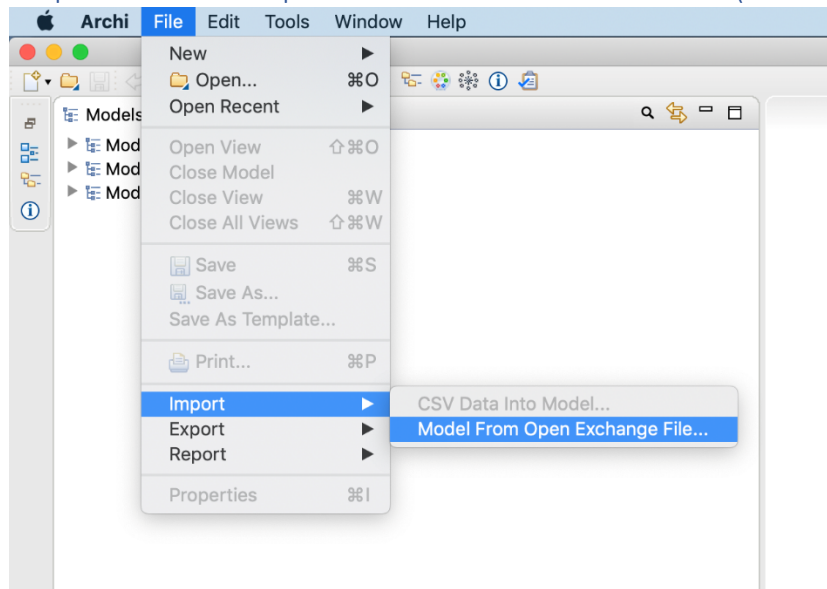

Step 5 – Confirm the final selection of contents to export.

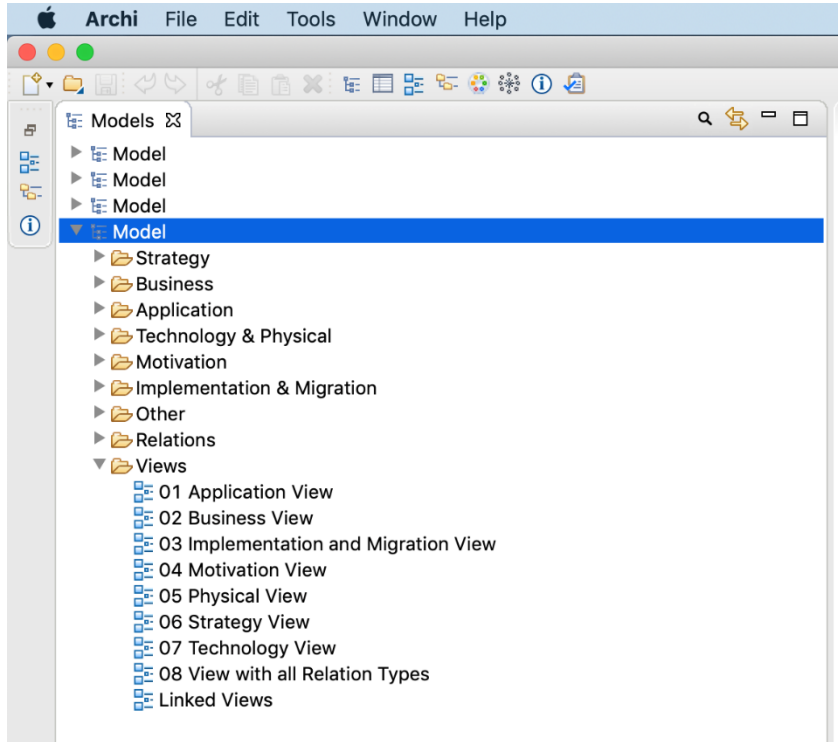

Step 6 – Save the exported model (in XML format).

Step 7 – Run the import function in an external tool (in this case – Archi)

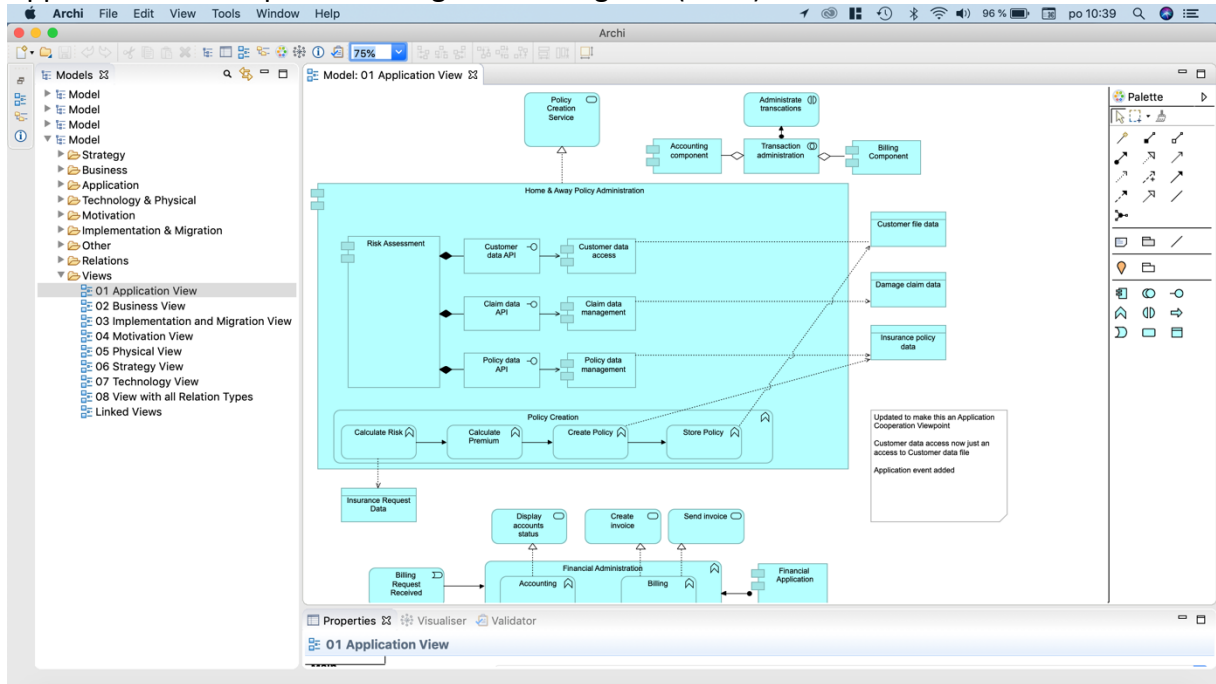

Step 8 – Verify the imported model in target modelling tool (in this case – Archi)
