1 Introduction

The following screenshots show the procedure and results of exporting a file in the ArchiMate® 3.0 Model Exchange File Format from ARIS 10.0.6 and importing it into Archi 4.3. The content to be exported from ARIS has been imported before from the sample file which is available at the following location:

The imported views as shown in the screenshots have not been altered manually in any way after the import in Archi was done.
2 Starting the Export in ARIS

The export is started in ARIS Architect from a selection of models.
3 Export Wizard – First Page

After invoking the action to export an ArchiMate® 3 file, the export wizard is displayed. On the first page of the wizard the name and location of the output file can be specified.
4 Export Wizard – Second Page

On the second page of the wizard the languages to be exported can be selected.
5 Export Wizard – Third Page

On the third page of the wizard settings regarding the assignment and connection levels can be made. It is also possible to select the version of the file format – either ArchiMate® 2 or ArchiMate® 3. With the final option, the export of organizations can be controlled.

The export is done with all assignment and connection levels, in the ArchiMate® 3 format and including organizations.
6 Starting the Import in Archi

In Archi the import can be started from the file menu.
7 Selecting the Import File in Archi

The file which has been exported from ARIS before is selected.
8 Overview of Import Result in Archi

After the import is done, the organization structure and views which were visible in the first screenshot of ARIS are now visible in Archi as well.
9 Imported View – 01 Application View
10 Imported View – 02 Business View
11 Imported View – 03 Implementation and Migration View
12 Imported View – 04 Motivation View
13 Imported View – 05 Physical View
14 Imported View – 06 Strategy View
15 Imported View – 07 Technology View
16 Imported View – 08 View with all Relation Types
17 Imported View – Linked Views
